

Another city protected by UTC Fire & Security

**Nothing happening.**

No service interruption. No noise. No vibration. No smoke. No panic. Just the sound of silence, one nonevent at a time.

**Sink or swim? Not an option.**

Our high pressure water mist systems protect cabins, galleys and engine rooms by delivering microdroplets of water through narrow tubing made of reclaimable materials, while using up to 90% less water. Lighter materials and less water needed means less weight for the ship to carry.

**Flambé, available only in the dining room.**

In the galley, our wet chemical system uses a patented process that simultaneously turns cooking grease into combustion resistant soap, vaporizes water to create steam for cooling, and interrupts combustion's chemical chain reaction.

**Security is big business.**

We provide security solutions to 65% of the Fortune 100 companies and 35% of the Fortune 500.

**Security blanket.**

We have 10,200 technicians making 3.3 million fire and security service visits worldwide each year.

**Some fog is good.**

Maximizing surface area, the nozzles in UTC Fire & Security's HI-FOG® water mist fire suppression system release tiny droplets to cool materials below combustible temperatures. Nothing like physics to do more with less.

**Cities on water. Cities on land.**

We protect you from fire when an ocean of water can't. We supply more than 13 million fire extinguishers annually for use on oceans and land worldwide.

**Something you can bet on.**

Whether in a ship's casino or one of the world's largest in Macau, access control and employee security are critical. Along with other features, our systems prevent shared identities so an ID can't be scanned and passed to someone else for use.

**Visit our other showroom: Westminster Abbey.**

Or the Eiffel Tower. Or the Beijing History Museum. Or the National Archives, the home of the Declaration of Independence. Our high sensitivity smoke systems are everywhere the irreplaceable is.

**When sparks are supposed to fly.**

When a vacation is this romantic, it's important that every stateroom be equipped with a Kidde® fire extinguisher.

**NOT ALL THE ASSETS WE PROTECT ARE ON PAPER.**

From rescue helicopters to elevators ascending 50 stories effortlessly to smoke alarms by the millions. From building security to ozone safe refrigerants. Learn more about United Technologies, a globally balanced company working to protect your life and property. To feel more secure, here or overseas, go to [utc.com](http://utc.com).
